

Installation Instructions
Wall/Column Mounting Brackets
1-260-399-4828 – www.ningboglobal sourcing.com

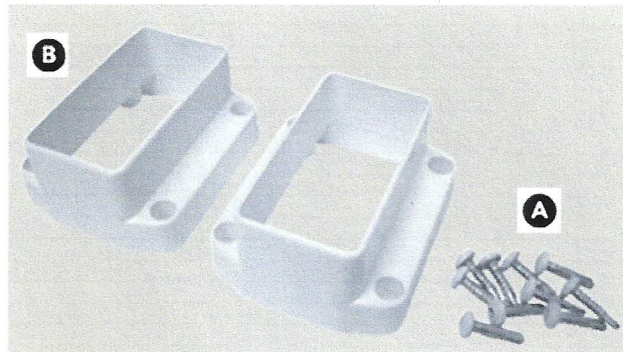

The wall/column mounting brackets allow for attachment of our Classic Rail system to existing posts, columns and suitable wall surfaces.

IMPORTANT – Wall / Column brackets should not be cut or altered. Separate brackets are designed and necessary for stair / angle purposes. Please refer to website or retail location for availability.

Tools required: Screwdriver and protective safety eyewear.

Included in this bag are all screws to install the wall/column mounting brackets

- A** 4/5 in. (10x)
- B** Rail Brackets (2x)

This guideline shows the general installation of the wall/column mounting bracket to a suitable flat surface with the supplied screws required.

1. Mark the location where the bracket will be installed with a pencil.
2. Insert the brackets over the rails.
3. Place the section between the posts and the wall/column.
4. Make sure that the section is level.

Secure the brackets with the screws provided. Pre-drill of holes are recommended.
